

LOUIS MARCĒL

“

Specifically designed to bring together extraordinary materials and exceptional craftsmanship

Designer influenced, this well-balanced collection centres around eternal beauty and dignified design. Models are soft, feminine and uniquely created to subtly complement the progressive lens wearer in colour, shape and comfort. With over 30 styles suitable for a wide range of women, the collection is one of exquisite quality.

The Louis Marcel Couture collection is the ultimate in luxury eyewear, specifically designed to bring together extraordinary materials and exceptional craftsmanship. Elements include Swarovski crystals, coloured gems and Italian acetates, which produce individual frame styles that sit in harmony with the face.

Looking beyond fashion, colours and shapes are carefully researched to ensure they flatter skin-tones and graceful wardrobes, with delicate olive, gold, taupe and nude pink shades subtly illuminating the eyes and complexion, while offering a natural and youthful look.

Like a sophisticated timepiece each frame has style and a certain clarity, which undoubtedly stands the test of time.
